Selection of Valuation Methodology

There is no single definition of the term 'price' that is suitable for all purposes or at all times. The price of a particular asset may vary according to different valuation methodologies that are adopted to ascertain the price for a specific purpose. Valuation of securities is an inexact science. It may sometimes involve a set of judgments and assumptions that may be subject to certain uncertainties. In the section below, Independent Registered Valuer has discussed some of the commonly used valuation.

methodologies. The valuation methodology to be adopted varies from case to case depending upon different factors affecting valuation. There are a number of methodologies to price companies / businesses using historical and forecast financials of the company.

A typical valuation analysis involves review and analysis of historical financials of the company and broad comparison of the company's forecast financial projections as regards all the significant macro and micro variables like economy and industry growth rate assumptions, inflation, interest and foreign exchange rates and tax rate forecasts. Company's profitability factors (industry competitive factors and company's operating strategies and its competitive position in the industry), economies of scale and optimal capital structure also affects the business valuation of the company.

However, the price is specific to the point in time and may change with the passage of time. In the present case, the objective of the valuation exercise is to price the shares of CFL.

The valuation exercise is aimed at the assessment of the Fair price of the equity shares of the company. I am required to arrive at the above valuations based on internationally accepted valuation practices.

As per RICS appraisal Manual, the Fair Value (FV) is defined as 'The price that would be received to sell an asset, or paid to transfer a liability, in an orderly transaction between market participants at the measurement date.

Ind AS (113) as well as IFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Approach and Methodology.

Valuation is not an exact science and is dependent on various factors such as specific nature of business, economic life cycle in which the industry and company is operating, past financial performance of the business, future growth potential of the business, business model, management of the company, relevance of technology in the business model, liquidity of equity and much more. The results of the valuation exercise may vary significant depending on the basis used, the specific circumstances and the judgment of the valuer. In respect of going concerns, certain valuation techniques have evolved over time and are commonly in vogue.

Various techniques may be used such as Net Asset Value Method, Price-Earnings Multiple Method, EV/EBITA Multiple Method, Discounted Cash Flow Method among others to value. The choice of valuation approach depends on the purpose of valuation and various other business specific and industry specific factors. In some cases, a single valuation technique will be appropriate, whereas in others multiple valuation techniques will be appropriate.

As per the principles of valuation considered by the Hon'ble Supreme Court in its decision in the case of Hindustan Lever Employee Union v/s Hindustan Lever Limited, 1995 (83 Com Case 30), for amalgamation of companies, the Hon'ble Court upheld the valuation methodology adopted by the Valuers using a combination of Book Value (Net Asset Value), Yield (Earning Capacity) and Market Price

Method of Valuation

There are several commonly used and accepted methods for determining the value of business/shares of the company, which would be applied to the present case, to the extent relevant and applicable, such as:

- Net Asset value or Breakup value based on the value of the assets and liabilities (NAV).
- Value based on the Profit Earning Capacity Value (PECV) method.
- Value based on Market Price method.

Asset Approach - Net Asset Value Method (NAV)

The Net Asset Value method attempts to measure the value of the net assets of the company against each share. It is computed by taking the net value of the company's assets, subtracting from them the amount of liabilities and preferred shareholders claims, and dividing the reminder amongst the number of equity shares. For an investment company valuation, NAV valuation, based on the asset backing is generally given more importance. Net Asset Value Method is also considered appropriate, where the future cash flows / commercial operations of the valued company cannot be reasonably ascertained or the company is recently incorporated.

The calculation is appended herewith as per Annexure 1.

Valuation under Profit Earning Capacity Method:

This method of valuation presumes the continuity of business and uses the past earnings. For the purpose of the Profit Earning Capacity Value of the shares, the commonly accepted approach is to capitalize average earnings of past at an appropriate rate of capitalization, to arrive at a fair value per share. While calculating Average Earning Per Share, the audited financial statements for the year ended March 31, 2020, March 31, 2021 and March 31, 2022 taken into consideration and EPS is capitalized by taking Industry Composite PE of 34.60 (Source: Industry P/E Ratio is taken from the Capital Market Magazine, Edition: May 30, 2022 - June 12, 2022, Page No. 47, Industry: Finance & Investments).

The calculation is appended herewith as per **Annexure 2**.

Market Approach - Market Price Method

In the instant case, the Equity Shares of the Company are listed on BSE and CSE. However, we have obtained trade data from BSE as there is no trading done on CSE. Further, the Equity Shares of the Company are frequently traded within the meaning of explanation provided in Regulation 164 (5) of Chapter V of the SEBI (ICDR) Regulations, 2018. Accordingly for calculation of market value, we have considered the period as per Regulation 164 of Chapter V of SEBI (ICDR) Regulations, 2018.

The calculation is appended herewith as per Annexure 3.

This Valuation Report is issued in compliance with Regulation 166A of Chapter V of SEBI (ICDR) Regulations, 2018.
